Agenda:

Landscape remodel projects:

View from the Board:

Board wants to have a hold on the Landscape projects.

We will still move forward with the planning. Vicky will ask Paul and Doug to work on the Gates.

Unit 39 plant replacement is also needed.
We will have to work on the planning

Irrigation Equipment Project Update:

Controllers: Recommended that the Unit 39 and 44 controllers be done first. Then the potable areas. Finally the Non-potable areas to get off the City controller. All fix on fail have to use the ET controllers.
Nozzles: These will be second on the list

Hydretain redux:

We recommend at least 1 application on the shrubs at least to get through the summer.

BLM recommendation is for the water savings. The cost will more than be covered by the use of Water Trucks and or replacement of the landscape.

Vicky, to get more BLM info on Hydretain.

Other items:

Can any areas be switch to non-potable, Vicky to check.

Trees of Heaven coming back with a vengeance were they not being treated?

Trees of Heaven what is the right fix. Need to have a plan. Vicky to work with the contractor

The dead Mitigation Oak removal on Clark Dominguez trail will occur soon.

NO meeting in July.
